

**May we offer
a helping hand?**

WOUND CARE **DryMax[®]**
EXTRA EASY

How to get help without involving others

ABSORBEST
TECHNOLOGY

Fight the feeling of being insufficient.

Even though we are in the world to support each other, times occur when we stand alone. When we have to handle situations where a helping hand would be invaluable.

In your efforts to treat the patient sometimes the simplest solution may be inestimable.

WOUND CARE **DryMax**[®]
EXTRA EASY

**A unique superabsorbent dressing
developed to be extra easy to apply.**

Application Aid

Easiest possible

Two low peel adhesive lines help the dressing to adhere to the skin. Just apply, relax and fixate. Quick and no more fumbling.

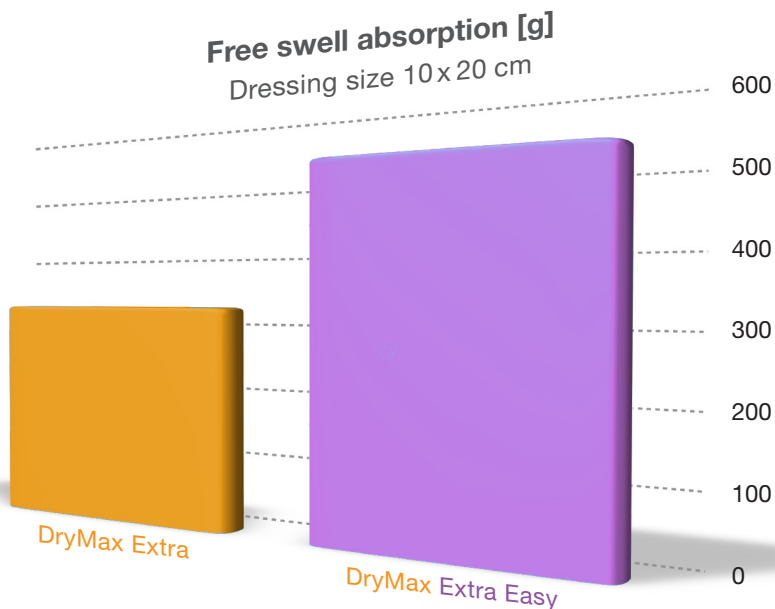

Repositioning

The gentle soft tack prevents sliding, minimise risk for contamination and allows for atraumatic removal of the dressing.

Even better

Improved absorption capacity contributes to fewer dressing changes – with all the positive effects of:

- Increased comfort for the patient
- Cost effectiveness
- Saved nursing time

Free swell tests, test method EN 13726-1:2002. Test made on whole products size 10x20 cm. Internal test reports R15-0083 and R15-0092.

“ The simple ideas are often the smartest. It is as if I suddenly got an extra hand. ”
